

ACKNOWLEDGEMENTS

The Implementation Development Map (IDM) was developed with funding from the Bill & Melinda Gates Foundation (BMGF). The IDM is a process-oriented tool designed to help state leaders measure and improve their state's pre-Kindergarten (pre-K) policies and implement high-quality pre-K systems and practices that produce equitable opportunities for all children. The tool was developed as part of the BMGF's National Early Learning Strategy - Partnership for Pre-K Improvement (PPI), an effort led by three organizations: Cultivate Learning at the University of Washington, Start Early (formerly known as the Ounce of Prevention Fund), and the Alliance for Early Success.

The IDM tool was developed with feedback from state agency leads, researchers, and advocates from three key states that participated in the PPI project - Oregon, Tennessee, and Washington. Early learning leaders from additional states also provided feedback through a one-day stakeholder feedback session and several rounds of A/B testing and cognitive interviewing (i.e. a review of the IDM to gain insight that can enhance understanding of question validity and response error). Participating states and individual contributors included:
